# TELE ECHO AND USG REPORTING SOFTWARE

Improving Quality, Efficiency, and Patient Outcomes.

[www.schamka-holding.com](http://www.schamka-holding.com)

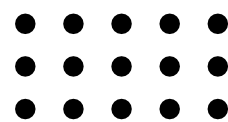

# 1 What is Tele-echo reporting software

**Tele-Echo and USG reporting Software** is a secure, web-based platform that enables **remote echocardiography and USG reporting** by expert cardiologists and radiologists—anytime, anywhere.

It connects **clinics, diagnostic centers, hospitals, and remote specialists** on a single digital workflow, enabling fast, standardized, and accurate medical reports with minimal effort.

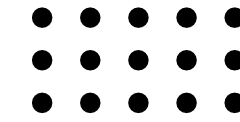

The software also works in the standalone mode

❖ From scan to report — seamlessly, digitally, and securely.

# 2. Current Scenario

## The Problem Today

Despite advanced imaging machines, **reporting remains a major bottleneck.**  
**Current challenges include:**

❖ Delays due to non-availability of expert doctors

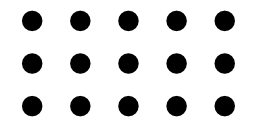

❖ Difficulty in sharing large echo images and videos

❖ Heavy dependency on on-site specialists

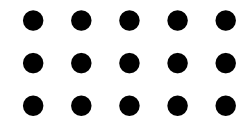

❖ Manual and repetitive reporting processes

❖ Inconsistent report formats across centers

❖ Limited scalability during peak patient loads

*Longer turnaround times, frustrated patients, and lost efficiency.*

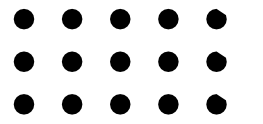

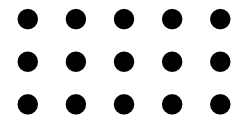

# 3. Our Solution Addressing Key Challenges

Schamka Tele-Echo and USG Reporting Software eliminates delays by enabling real-time remote reporting.

- ✔ Instant assignment of cases to remote experts
- ✔ Fast image/video uploads from any center
- ✔ Structured, standardized report generation
- ✔ Reports delivered in under 1 hour, even remotely
- ✔ Email & WhatsApp report delivery

❖ From days to minutes — reporting redefined.

# 4. What Can the Software Do

Schamka is dedicated to enabling cardiologists and radiologists globally by providing tools that allow for rapid report generation, ensuring speed, consistency, and quality in patient reports delivery.

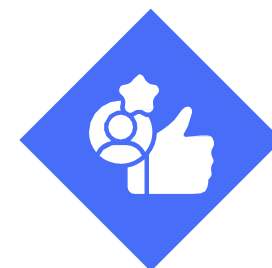

**Planning**  
Cut report turnaround time drastically

**Leading**  
Enable remote reporting across geographies

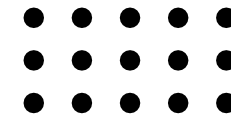

**Organizing**  
Centralize image, video, and report management

**Controlling**  
Scale from a single clinic to multi-hospital networks

❖ **One platform. Unlimited reach.**

# 5. Key Features of the Software

- ❖ 24x7 reporting from any device (desktop, tablet, mobile)
- ❖ Remote case transfer between doctors
- ❖ Image & video playback
- ❖ Multi-format report generation
- ❖ DICOM, MP4, WAV, JPEG support
- ❖ ASE Compliant Structured reports
- ❖ Advanced measurement and observation tools
- ❖ Image/video capture for detailed analysis
- ❖ Long-term study storage for comparison
- ❖ Critical case referral to experts
- ❖ Visual annotations for patient education
- ❖ Interactive dashboards for clinics and doctors
- ❖ Email & WhatsApp alerts

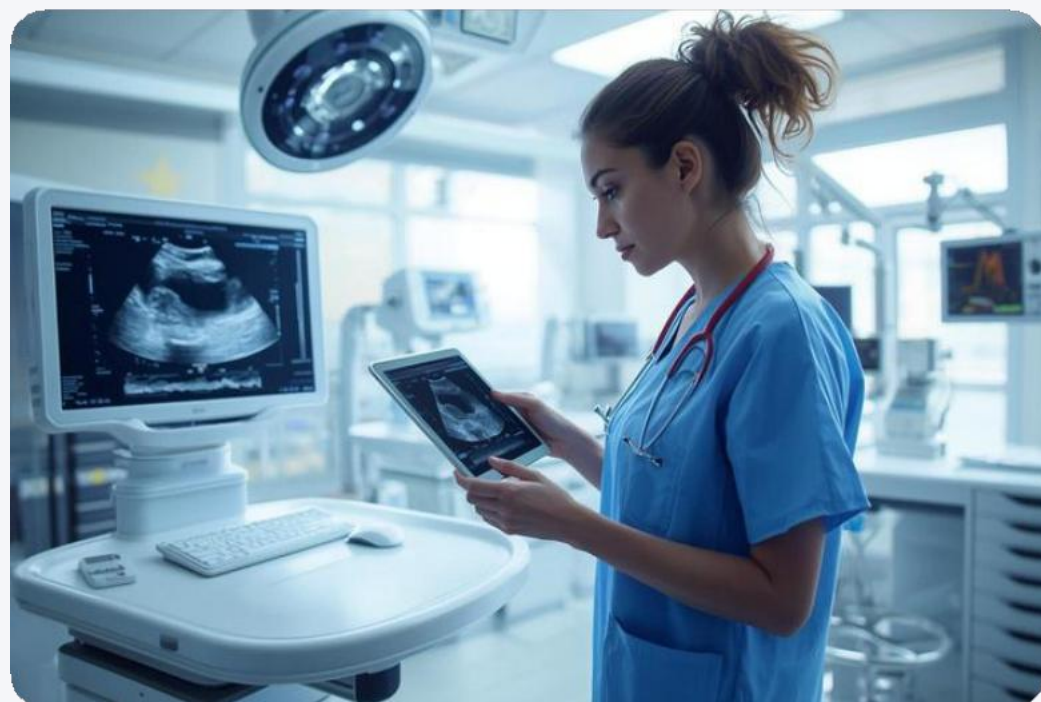

Designed for  
**Seamless Echo &  
USG Workflows**

**User-Friendly with  
Minimal Learning  
Curve**

**Cloud or Local  
Deployment  
Options Available**

**Instant  
Access**

**Quick case  
assignments** for rapid  
report generation by  
remote experts.

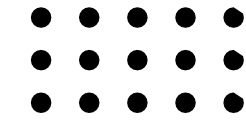

**Standardized  
Reports**

Streamlined structure  
for consistent and  
**accurate report  
generation** across all  
cases.

# 6. Benefits

## Benefits for Clinics, Doctors, and Patients

**01**

For Clinics & Hospitals

- ❖ Faster report turnaround
- ❖ Reduced dependency on full-time specialists
- ❖ Higher patient throughput
- ❖ Consistent, professional reports
- ❖ Lower operational costs

**02**

For Cardiologists & Radiologists

- ❖ Work remotely, globally
- ❖ Manage multiple centres efficiently
- ❖ Structured reporting with fewer clicks
- ❖ Better work-life balance

**03**

For Patients

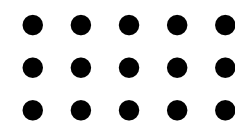

- ❖ Faster diagnosis
- ❖ Accurate, standardized reports
- ❖ Improved quality of care

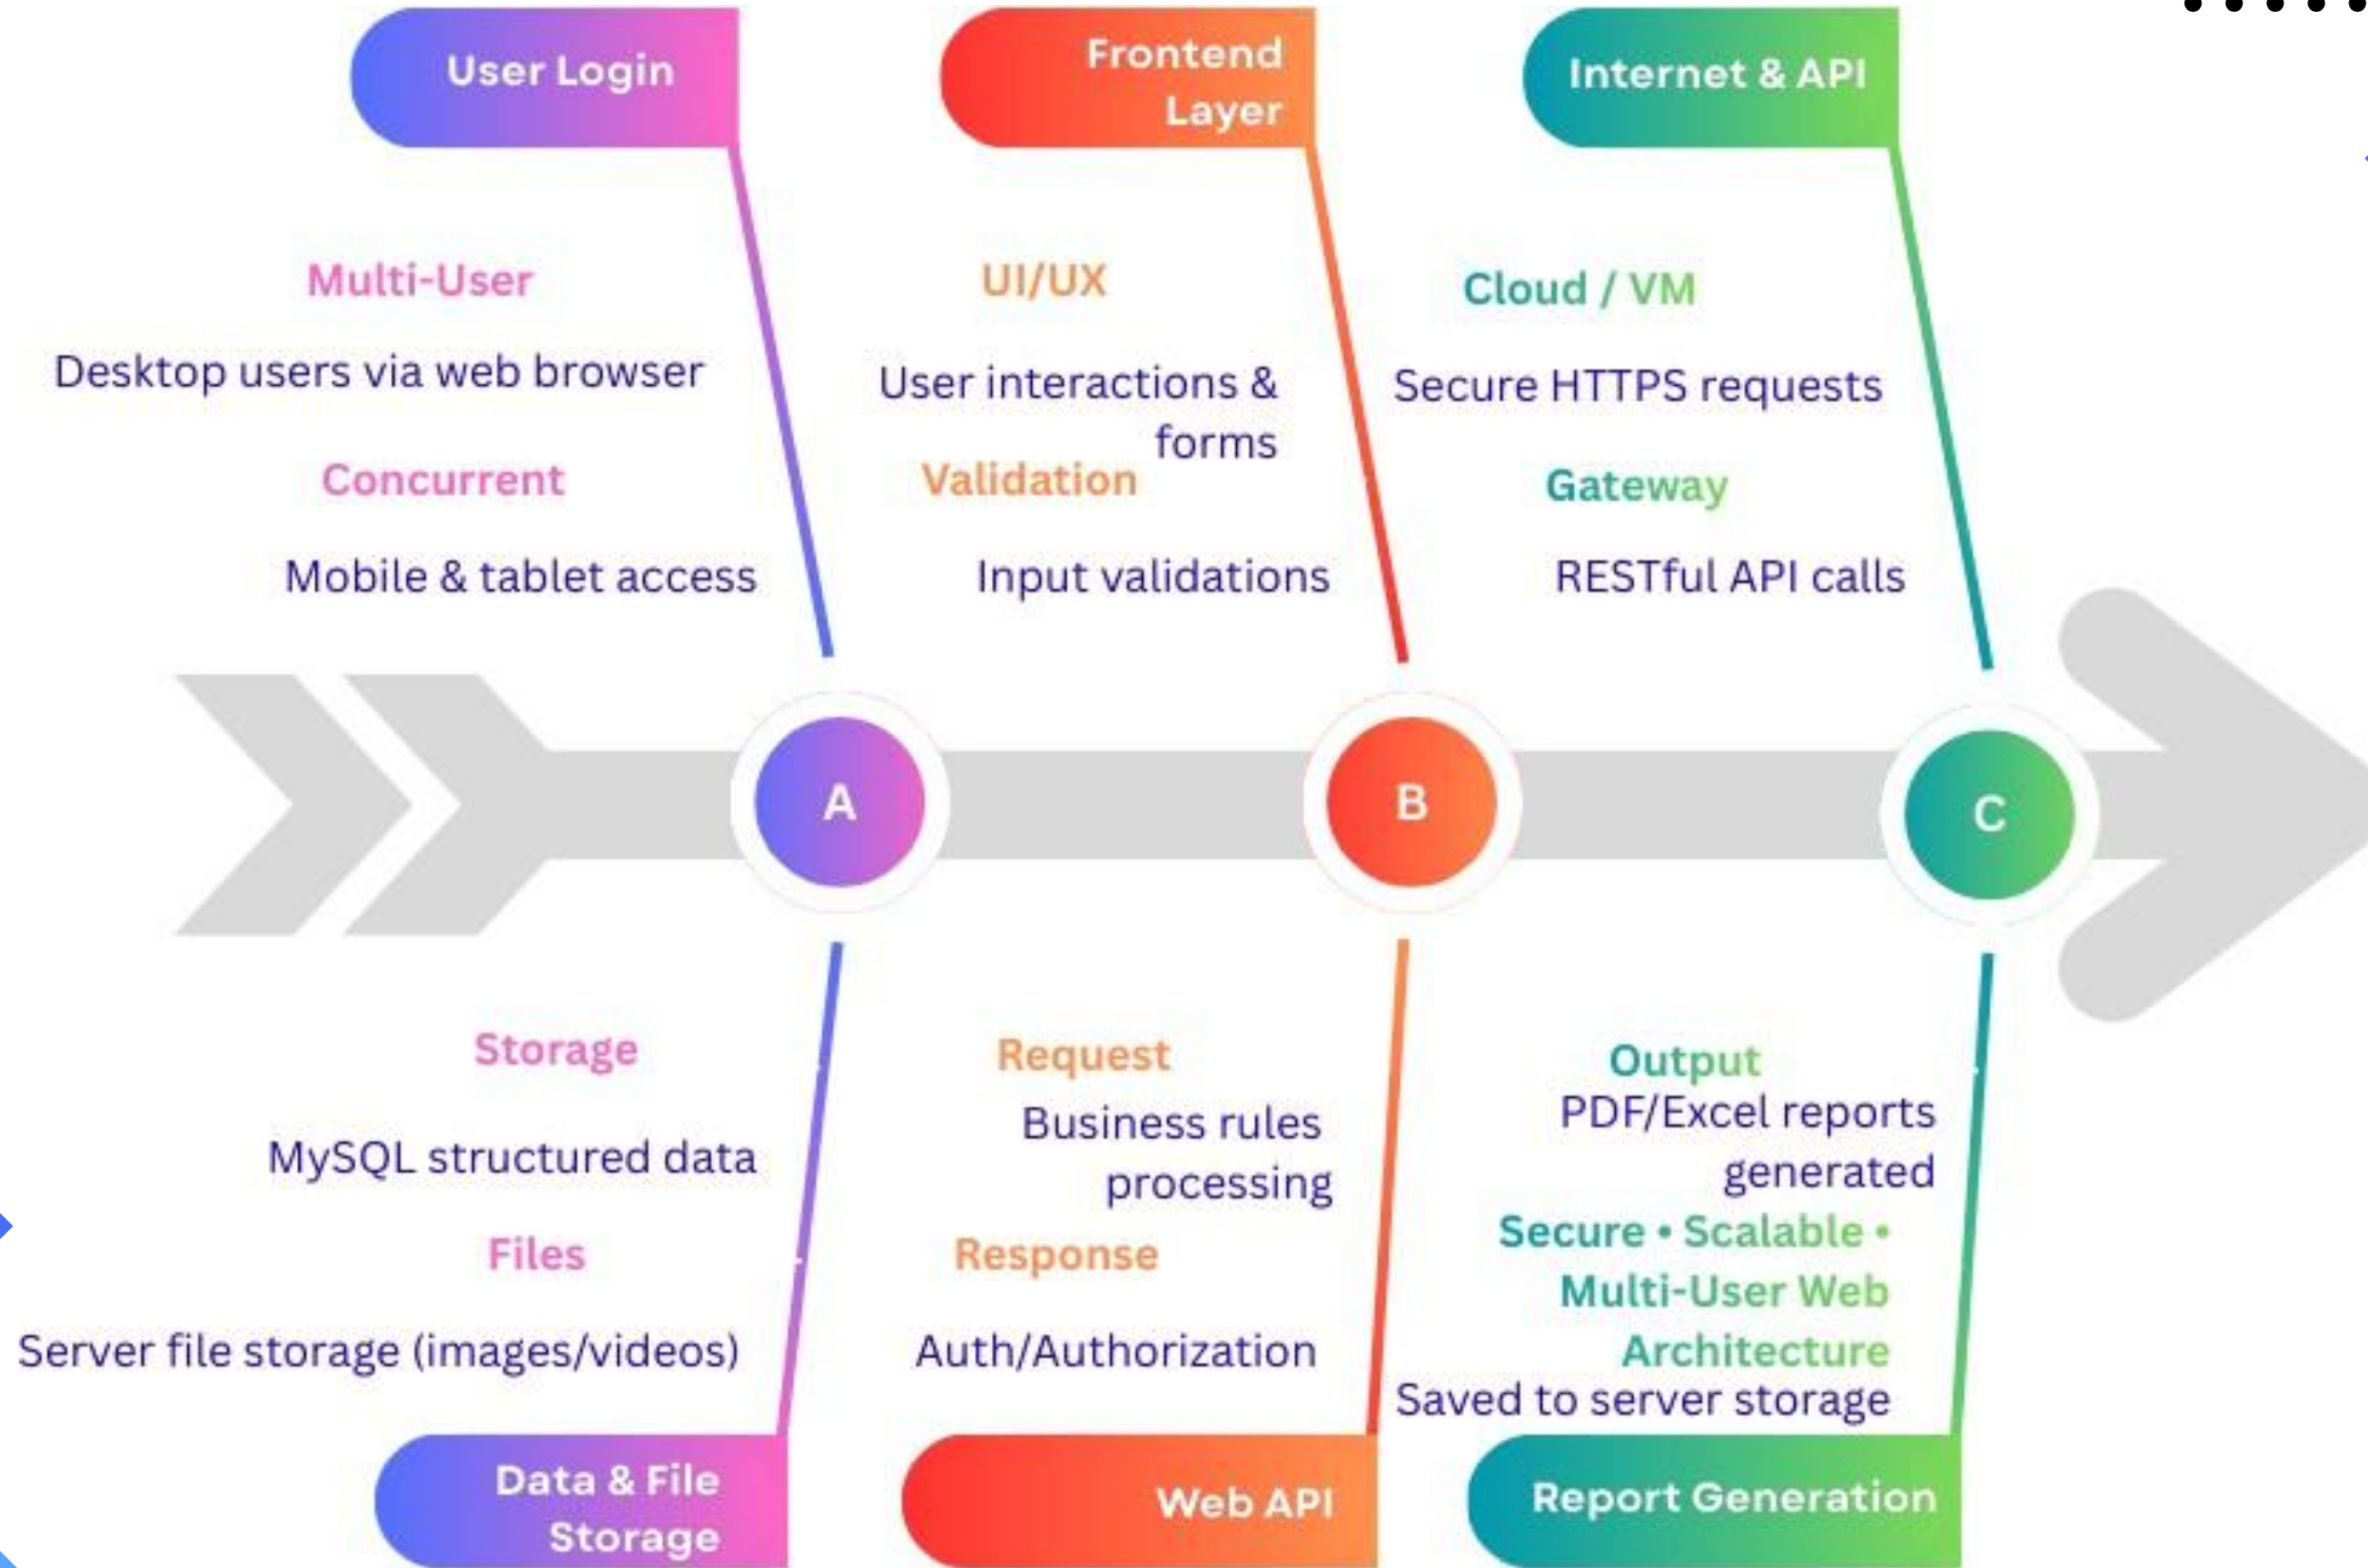

# 7. Software Stack & Architecture

Built for **high performance, scalability, secure and reliability.**

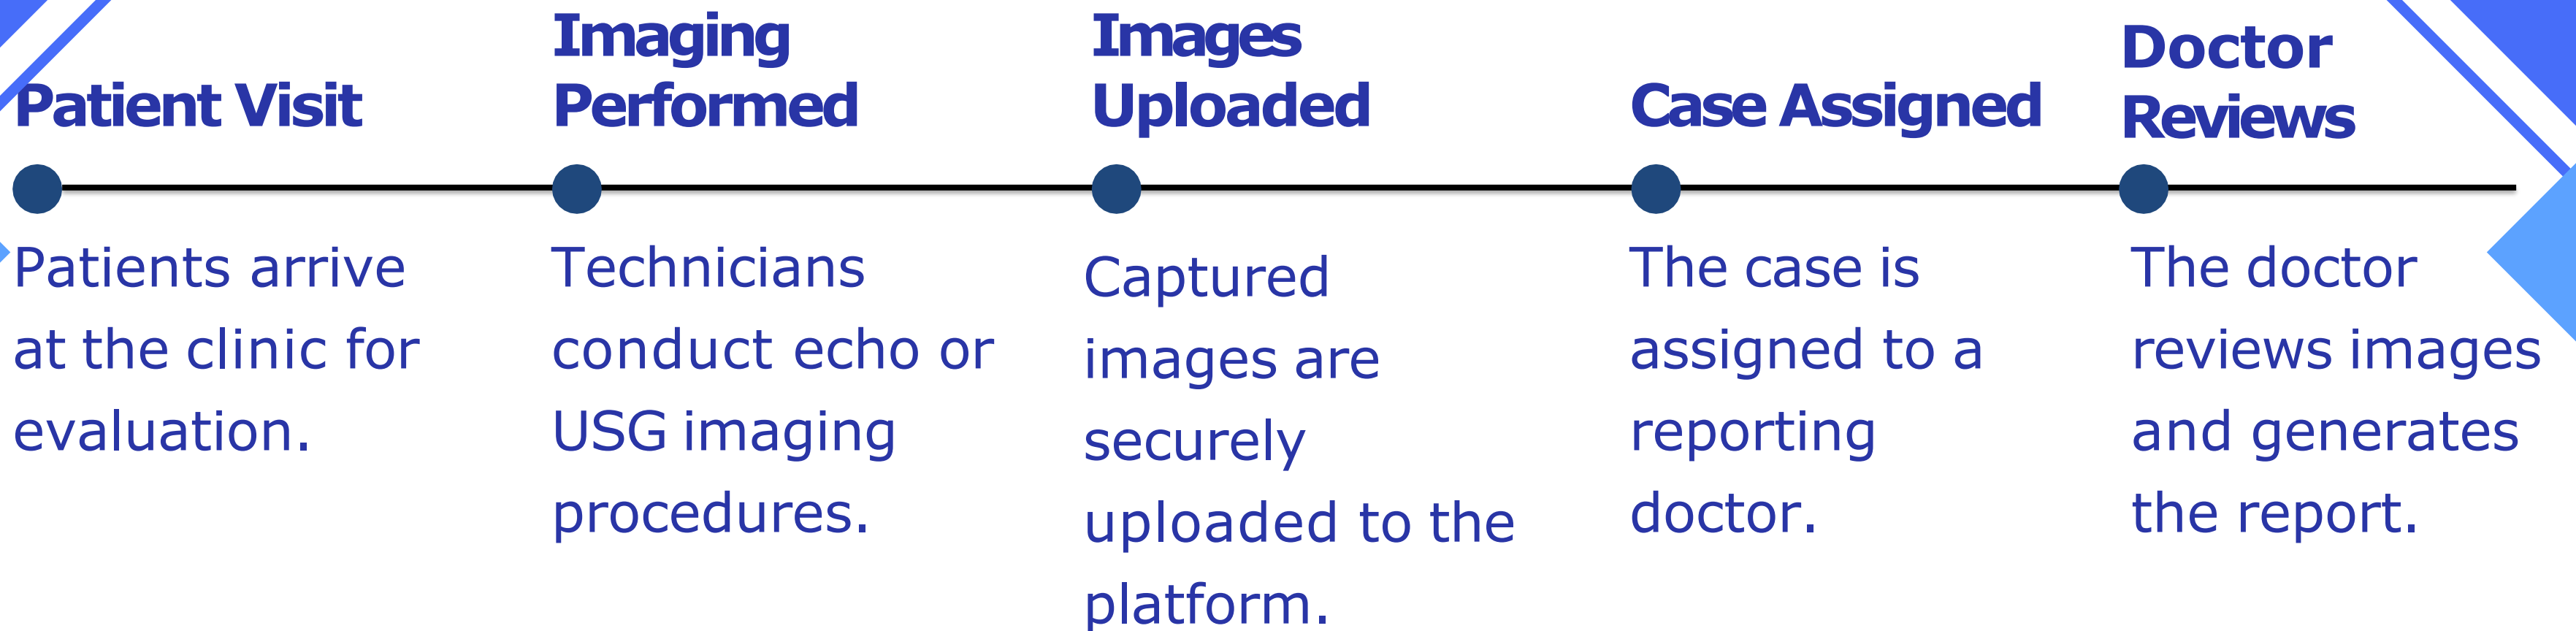

- ❖ Leveraging the latest secure, web-based technologies for robust frontend and backend services
- ❖ Powerful API to fetch and integrate data
- ❖ Database: MySQL
- ❖ Deployment: Cloud or On-Premise
- ❖ White-Label Ready: Custom branding supported

# Software Workflow

# 8. User Workflow & User Roles

## Roles

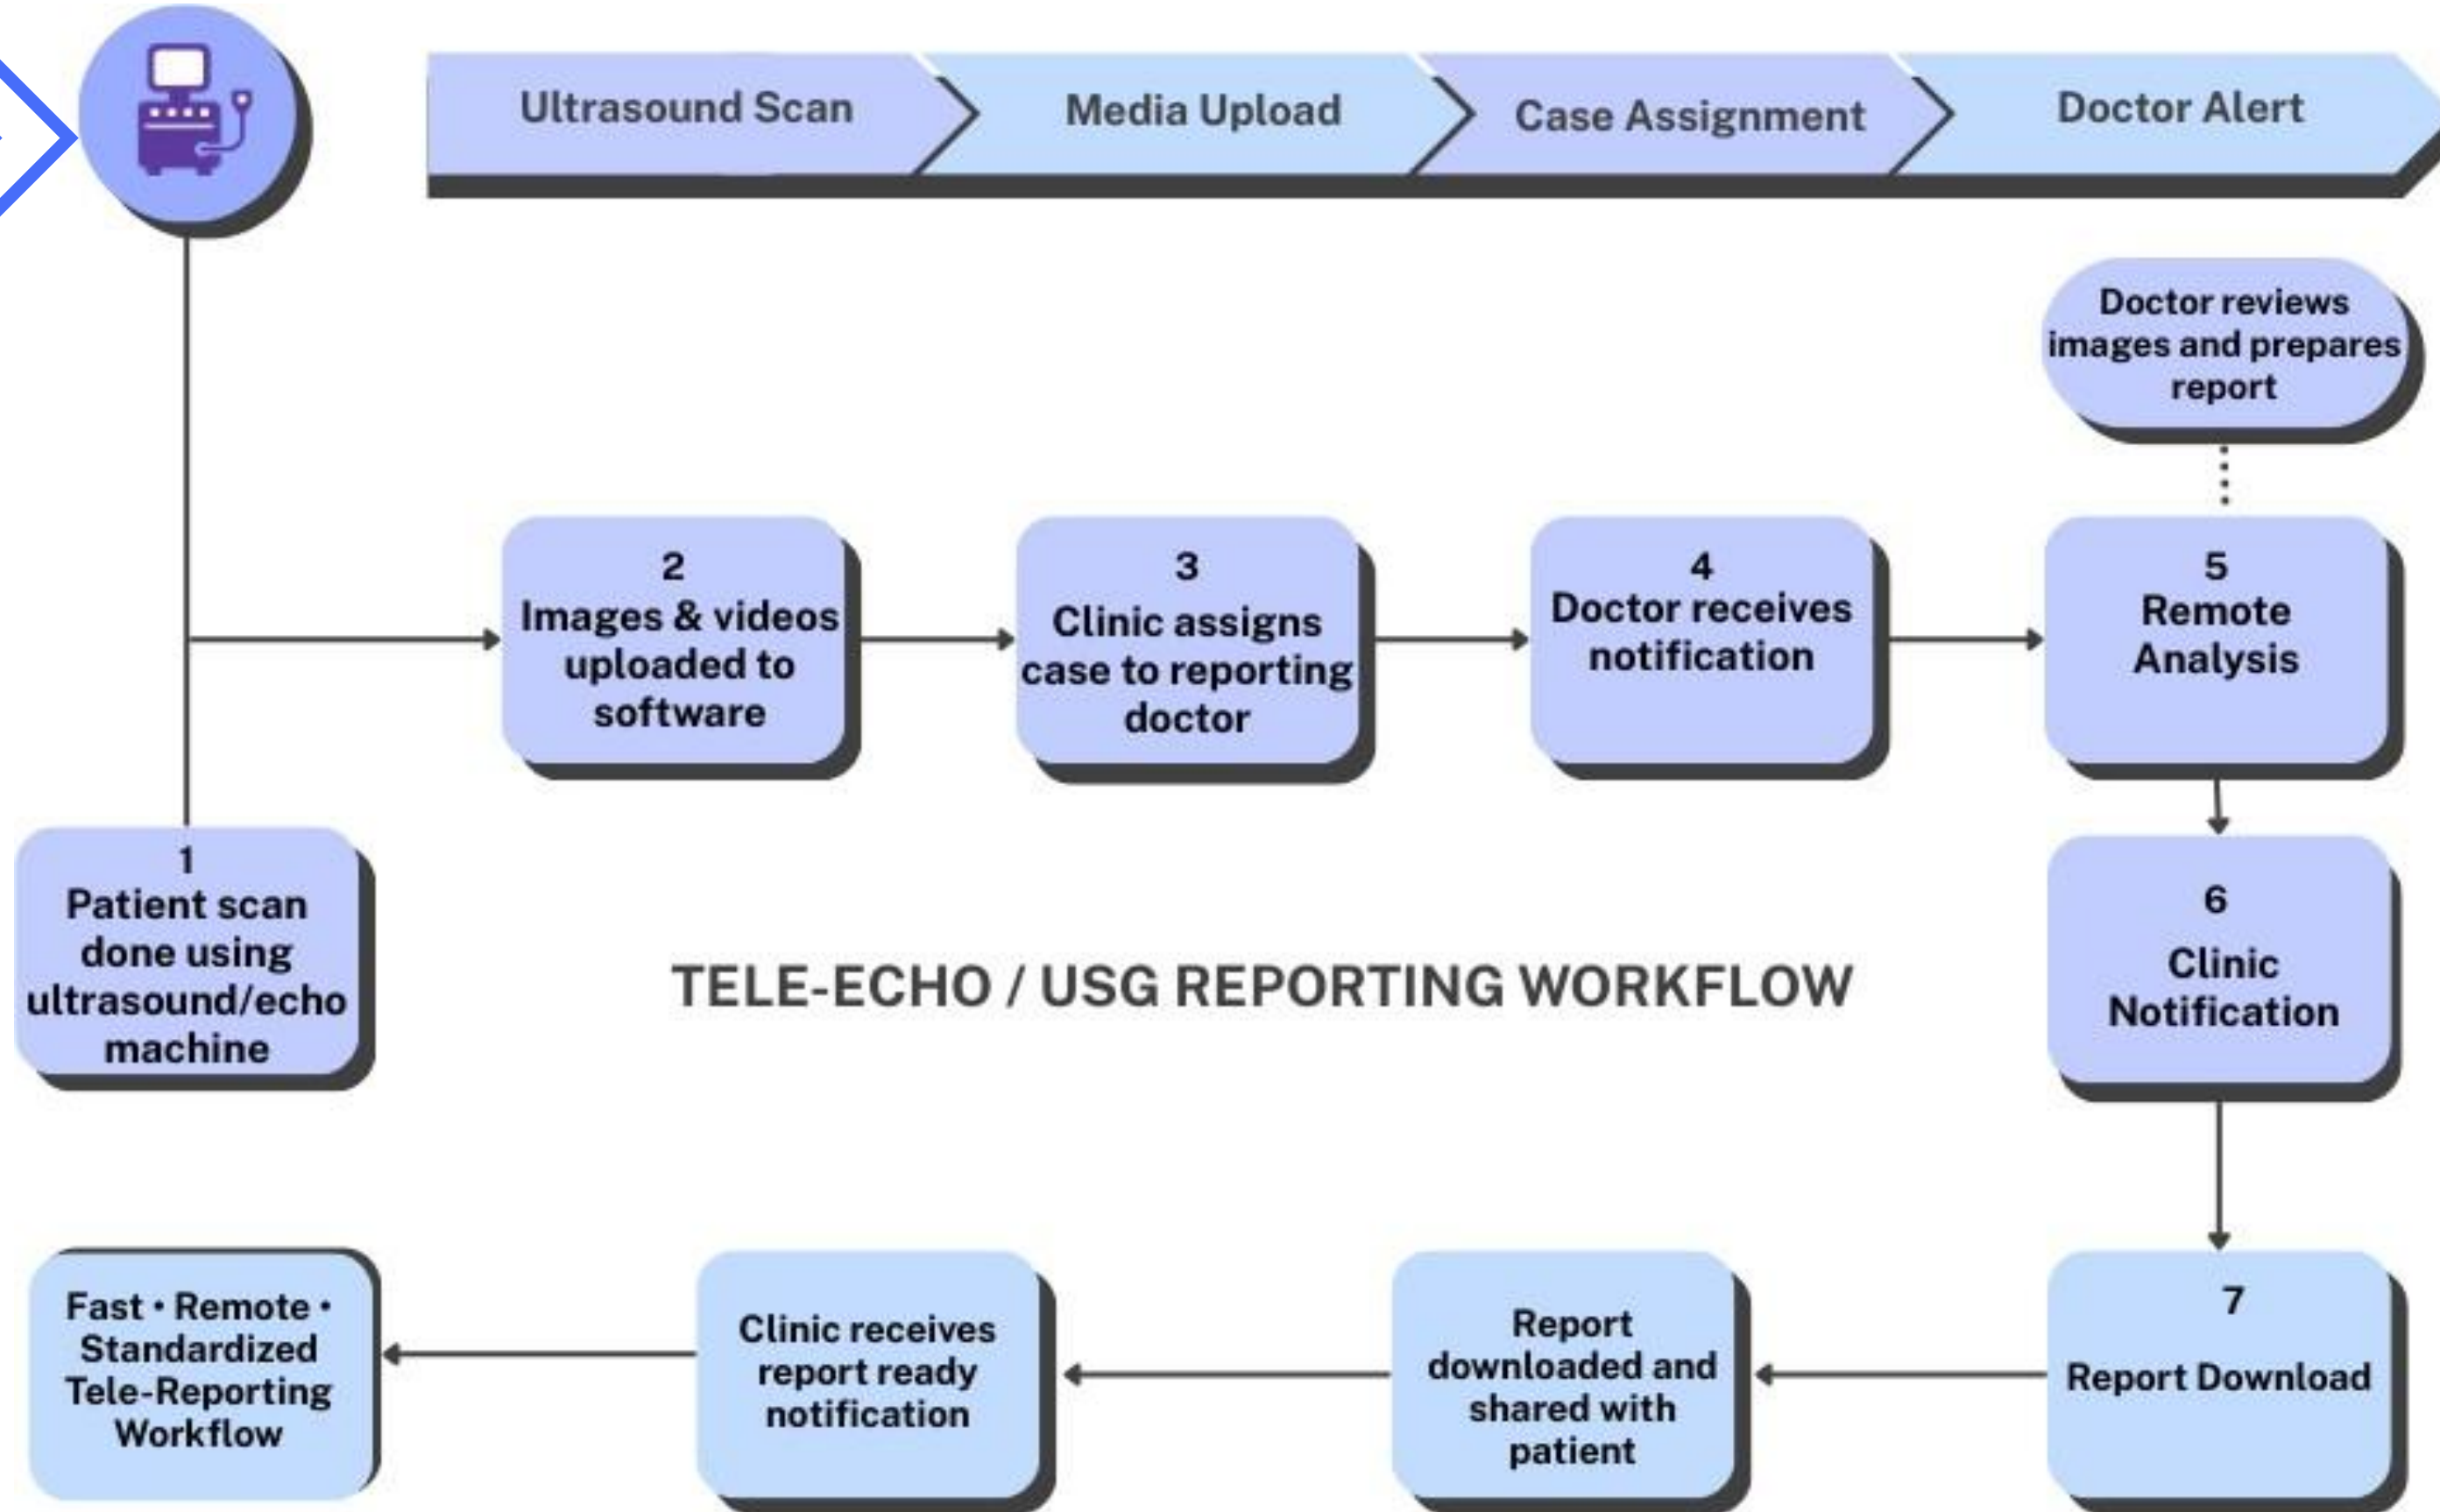

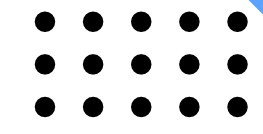

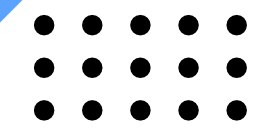

❖ Clinic / Hospital Admin

❖ Diagnostic Center Staff

❖ Reporting / Referring Doctor

❖ Patients Report Download

# 8. User Workflow

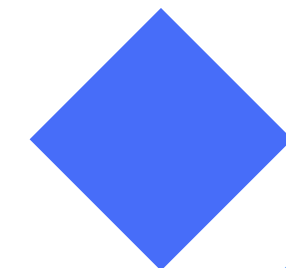

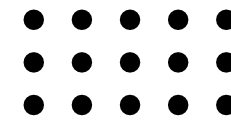

# 9. Security & Compliance

Our platform is built with **OWASP Top 10 compliance readiness**, delivering strong, industry-standard security to protect sensitive healthcare data. It incorporates **role-based access control, encrypted data transmission**, and detailed audit logging to ensure secure access, traceability, and compliance with healthcare privacy requirements.

## Key Security Highlights:

- ❖ OWASP Top 10 compliance-ready architecture
- ❖ Secure role-based access control (RBAC)
- ❖ Encrypted data transmission (HTTPS/TLS)
- ❖ Comprehensive audit logs and access tracking
- ❖ Designed specifically for healthcare data privacy

 **Your data. Fully protected.**

# 10. About Us

Schamka was established with a mission to deliver **quality, affordable telemedicine reporting solutions** globally.

❖ Over 4+ years of expertise in healthcare IT

❖ Led by IT professionals with 42+ years of experience

❖ Developed in consultation with renowned cardiologists and radiologists in India

❖ Purpose-built for Echo and USG Abdomen & Pelvis reporting

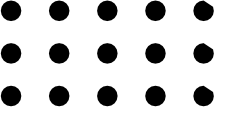

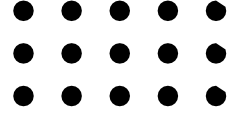

## Our Mission

❖ To help cardiologists and radiologists generate accurate reports with just a few clicks — anytime, anywhere

# 11 Why Choose US

## Workflows

Designed specifically for Echo & USG workflows

## Easy-to-Use

Intuitive design facilitates quick user adoption.

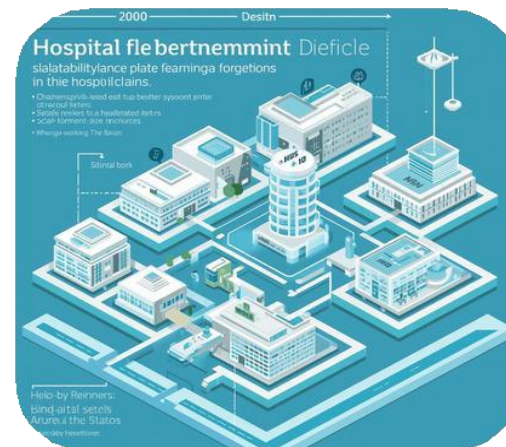

## Cloud +Local

Flexible deployment options suit diverse needs.

## White-Label

Custom branding enhances your clinic's identity.

## Scalable

Adapts easily from clinics to hospitals.

## REMOTE TRANSFER

Effortlessly share cases with other doctors.

- ❖ Schamka also offers cardiology and radiology reporting services through qualified specialists, Cardiologist and the Radiologist.

# 12 Contact Us

Let's transform diagnostic reporting together!
